Objective

Driven Computer Science Engineering student with expertise in full-stack development, cloud architecture, and secure backend services. Eager to apply strong analytical skills, hands-on experience earning Google Cloud (GCP) experience badges, and a collaborative mindset to drive innovation and deliver scalable business solutions. Actively preparing for the Google Cloud Professional Cloud Developer certification to design secure, enterprise-scale platforms.

Education

Vellore Institute of Technology-AP University — Vijaywada, India

B.Tech. in Computer Science Engineering; ***CGPA: 9.2/10*** — *Sep 2022 – July 2026*

(till 6th semester)

Experience

Bolt Innovative Transformations India Pvt. Ltd. — July 2025 – Dec 2025

Salesforce Developer Intern — *Remote*

- Built and configured scalable business applications using Salesforce Sales Cloud, Service Cloud, Lightning App Builder, and Flow Automation, aligning with enterprise cloud solution practices.
- Achieved Expeditioner Rank on Salesforce Trailhead, earning 25+ badges in CRM, automation, and cloud application development.
- Developing understanding of customer relationship management, data modeling, and cloud-based business solutions.

Deloitte USI — Jan 2026 – Present,

BTA Intern — *Hyderabad*

- Engineered Scalable Backend Services: Designed and maintained real-time analytics pipelines using Python on GCP, successfully processing large-scale event datasets with a focus on high availability.
- Infrastructure & Reliability: Managed distributed event tech infrastructure, implementing continuous logging, distributed tracing, and alerting to minimize downtime during high-traffic live operations.
- Secure & Agile Engineering: Collaborated within an Agile team to develop software components, integrating secure coding practices and system hardening principles to ensure robust, enterprise-scale platform performance.

Projects

VisionTrack: AI-Powered Automated Smart Attendance System

- Developed mission-critical AI/ML application integrating facial recognition (CNN, YOLO) and license plate recognition (Tesseract OCR) for real-time employee authentication.
- Achieved 98% face recognition and 92% license plate detection accuracy, ensuring secure and efficient access control.
- Optimized system for scalability, handling distributed processing of video streams with minimal latency.

India Watch News Application

- Architected and developed a dynamic news application using React and TypeScript to ensure secure, efficient, and maintainable frontend performance
- Engineered an infinite scroll feature to optimize continuous content delivery and improve client-side resource management.
- Implemented comprehensive bilingual support (English and Hindi), focusing on scalable application design.

Food For All: A Full-Stack Food Donation Platform (Hackfest2k24 — Top 15 finish)

- Architected and deployed scalable full-stack application using React (JavaScript), Node.js, MongoDB, and Socket.IO to connect donors with NGOs in real time.
- Improved server performance by 60% and ensured 99.9% uptime during event.
- Designed RESTful APIs for fast and reliable data exchange, boosting user retention by 50%.
- **Real-Time Communication:** Integrated Socket.IO for live updates, boosting user interaction by 50%
- **API Development:** Built and optimized RESTful APIs, leading to a 50% increase in user retention and seamless data exchange.
- **Database Management:** Architected MongoDB database solutions, increasing data retrieval speed by 70% .
- Implemented Heroku cloud deployment with performance monitoring and database optimization for high availability.

Technical Skills

Languages: Java, C++, SQL, Javascript, Typescript, Python

Cloud & Deployment: Google Cloud Platform (GCP), AWS, Heroku

Web & Application Development: React.js, Node.js, Express.js, RESTful APIs, Socket.IO

AI/ML & Data Analytics: TensorFlow, OpenCV, YOLO, CNNs, Tesseract OCR, Pandas, NumPy, Matplotlib

Database Systems: MongoDB, MySQL, PostgreSQL

Core CS & Security: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Software Engineering, OWASP Top 10, Secure SDLC, Zero Trust Architecture

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, OpenAI Codex, GitHub Copilot
